

The Technical Data Sheet of Dora Bacillus Amylolyticus

Product name:

Dora Bacillus amylolyticus

Identification of the product:

Dora bacillus amylolyticus kills soil bacteria, prevents and cures withered, rot, and other soil-borne diseases. Protect roots from pathogen infestation such as gray mould, yellow light blight, anthracnose, rice and wheat sheath blight. It activates soil, increases the absorption of nitrogen, phosphorus, potassium, silicon and calcium, and improves anti-freeze ability. Improve yield effectively, improve fruits' quality and taste.

Specification:

Appearance	Yellow brown powder
Effective Bacterium	$\geq 1 \times 10^{11}$ CFU / G
Moisture	$\leq 10\%$

Dosage:

Soil Application: Soil Application: 1.5-3 KG / Ha / time, 1-2 times during seedling and growth stage.

Compatibility with other fertilizers or pesticides

It can be used together with most organic fertilizers (Always do a test before wide-spread use).

Storage:

Stored under normal temperature, avoid high temperature and direct sunshine.

Packings:

25Kg/Bag.

Shelf life:

2 years.
